EDUCATION

Georgia Institute of Technology

M.S. in Robotics (GPA: 3.75/4.0)

Atlanta, GA

Expected May 2027

Relevant Coursework: Linear Control Systems, Computer Vision, Structural Dynamics, Kalman Filtering, PDEs for Image Processing and Filtering

Emory University

B.S. in Physics and Astronomy (GPA: 3.61/4.0)

Atlanta, GA

May 2025

Relevant Coursework: Classical Mechanics, Thermodynamics, Electrodynamics, Computational Modeling in Python, Linear Algebra, Astrophysics I & II

SKILLS

Programming: Python (NumPy, SciPy, Matplotlib, PyTorch, Astropy), C++, MATLAB

Design/Modeling: SolidWorks

Tools: Git, VS Code, MS Office

Language: Portuguese (Fluent), Spanish (Advanced), English (Fluent)

WORK EXPERIENCE

Volvo Autonomous Solutions

Autonomous Vehicles Intern

Greensboro, NC

May 2026 – Present

- Owning the creation of release note documentation for the latest autonomous driving software release delivered to VAS Autonomous Driving (AD) partners, as well as ensuring the existence of a process for developing partner agnostic documentation.
- Performing analysis on logs from autonomous trucks to evaluate driving performance and better understand different stopping scenarios for mining and quarry operations based in Gothenburg, Sweden.
- Supporting development of a field issue intake, triage, and prioritization model to streamline how reported issues are routed and resolved across the organization.

Yamaha Motor Corporation

Intern → Associate Product Manager

Kennesaw, GA

May 2024 – May 2026

- Automated the conversion of technical specification sheets from Japan into U.S. formats and into the InRiver PIM database using Excel VBA and Python, reducing manual processing time and minimizing human error across annual product updates.
- Developed a structured product development timeline that clearly delineated sub-team responsibilities, improving traceability and coordination across departments.
- Analyzed customer purchasing data to identify spending patterns, contributing insights for future product development and marketing strategies.

RESEARCH EXPERIENCE

Control, Coordination, and Competition under Uncertainty (C3U) Lab, Georgia Tech

Graduate Researcher

Atlanta, GA

Jan 2026 – Present

- Implemented a direct data-driven LQR controller in CVXPY validated on quadrotor dynamics in AirSim, including persistently-exciting input design and LMI-based closed-loop stability analysis.

Dr. Merida Batiste's Lab at Emory University

Undergraduate Researcher

Atlanta, GA

Jan 2022 – May 2025

- Completed an undergraduate honors thesis, "*Refining the Effective Radius Measure for a Sample of Early-Type Galaxies Through the Use of GALFIT*," using GALFIT on the ATLAS3D sample to compare single vs. multi-component fits and assess their impact on the $M - \sigma$ relation.
